

# STAMINA COIN GAME - SCG WHITEPAPER TOKEN GAME

Self-Sufficient Multi-Modal Ecosystem with  
Economy in SCG

# WHAT IS THE PROJECT?

The Stamina Coin Game (SCG) will be a decentralized digital ecosystem built on a token with a fixed total supply of 100 billion units, of which 95.85 billion will be accessible and 4.15 billion were lost in initial technical tests. The contract will be waived, immutable, and secure—ensuring absolute transparency from day one.

SCG is not a financial asset. It is the official currency of a global digital league, comprised of four AAA sports: soccer, basketball, tactical shooting, and car racing. Each match will require SCG, each superior performance will generate XP, and each upgrade will be purchased in the internal store—all within an integrated multi-wallet, without the need for MetaMask.

"It's not supply that sustains value — it's the real demand generated by competition."  
Projects like Axie Infinity collapsed because they prioritized speculation, not utility. We do the opposite.

All game modes will be 100% skill-based — no luck, no random number generation (RNG), and no bad luck mechanics. The reward in SCG will exclusively recognize the participant's technical, tactical, and strategic performance. The project will not be subject to local regulations: each user will be responsible for their own legal compliance in their jurisdiction.

**PROJECTS LIKE AXIE INFINITY COLLAPSED  
BECAUSE THEY PRIORITIZED SPECULATION OVER  
UTILITY. WE DO THE OPPOSITE.**

**MVP: FIRST REAL STEP**

**INSPIRED BY  
WINNING ELEVEN 10**

Before the release of the AAA modes, SCG will make available a functional soccer MVP, inspired by the classic Winning Eleven 10 (Pro Evolution Soccer 6) on PlayStation 2.

# THIS MVP WILL BE:

- Fast, tactical, and fair — victory will depend on skill, not luck
- Lightweight and accessible — will run on browser (PWA), mobile, and PC
- Completely original: fictional teams, custom shields, created names
- In it, participants will be able to use SCG to compete in ranked matches, accumulate XP, and receive rewards.
- Tier 1 and Tier 2 backers will have early and free access in the first few weeks.

# TOKENOMICS

The SCG will be distributed as follows:

- 1% to Tier 1 (958,500,000 SCG) — includes allocation for primary liquidity and payment of the management team
- 0.5% to Tier 2 (479,250,000 SCG) — includes allocation for secondary liquidity and payment of the management team
- 0.3% to Tier 3 (287,550,000 SCG) — includes allocation for tertiary liquidity and payment of the management team
- 0.2% to Tier 4 (191,700,000 SCG) — includes allocation for quaternary liquidity and payment of the management team + bonus

- 45.00% allocated to rewards across all modalities (monthly and annual tournaments) = 43,132,500,000 SCG
- 5.00% reserved for dynamic staking and loyalty benefits = 4,792,500,000 SCG
- 1.00% reserved for affiliates and partnerships = 958,500,000 SCG
- 5.00% allocated to the Community Expansion Fund = 4,792,500,000 SCG
- 42.00% symbolically locked every 5 years as a final security and emergency reserve = 40,257,000,000 SCG

- ✓ Total made available: 1,917,000,000 SCG (2%)
- ✓ Total retained in the ecosystem: 93,933,000,000 SCG (98%)

Since the token doesn't have a burning function, we don't simulate artificial scarcity. Instead, we create a mechanism of real value:

For each match, 0.1% of the SCG used will be directed to the Community Expansion Fund.

Ex: a match costs 2 SCG → 0.002 SCG goes to the fund.

This fund will be used exclusively to develop new modalities chosen by the community via poll (e.g., volleyball, golf, eSports).

The community will decide which modality will be funded each cycle.

The tokens are not destroyed — they are transformed into future utility.

💡 Why is this superior to burning?

Creates real value, not an illusion of scarcity

Gives decision-making power to the community

Expands the ecosystem organically

Sustains demand for SCG for decades

“We don’t remove tokens — we convert them into new arenas of competition.”

# MANDATORY CONSUMPTION MODE

To protect the ecosystem against immediate speculative movements, SCG will implement a mandatory consumption method:

When acquiring SCG in tiers or on trading platforms, the tokens will remain in the ecosystem wallet.

You can only transfer your SCG to an external wallet after demonstrating real skill, completing a minimum number of disputes with positive performance (e.g., 3 wins).

This ensures that those who enter first participate in the ecosystem before considering leaving.

“Those who compete, understand. Those who only speculate, do not remain.”

# REALISTIC REFERENCE PRICE

Due to the volatility of BNB, the SCG reference price was adjusted to US\$0.20–0.25.

This aligns expectations and attracts long-term participants, not short-term traders.

“We promise utility, not miraculous multiplication.”

# SEQUENCING OF TIERS AND TOKEN RELEASE

The launch will follow a fair order:

Tier 1 and Tier 2 will occur exclusively on the local platform, priced at US\$0.003 and US\$0.005 per SCG.

Tier 3 and Tier 4 will occur exclusively on the global site, priced at US\$0.01 and US\$0.025 per SCG.

All tokens from Tier 1 and Tier 2 will be credited to supporters' wallets before Tier 3 begins.

Once the modalities are ready, Tier 1 and Tier 2 participants will be able to compete immediately and accumulate rewards, even before public liquidity.

- Liquidity will only be activated after the completion of Tier 4, ensuring equal opportunity.

# DYNAMIC STAKING

# FAIR AND SUSTAINABLE

Staking will offer 0.015% per day (~5.5% per year) — enough to reward, but not to attract income hunters.

Benefits will require active participation in competitions: those who only maintain a balance receive less.

Optional lock: more time = more bonus (up to +20%).

“High staking attracts speculators. Fair staking attracts competitors.”

# CONSTRUCTION TIERS

Each tier will fund a AAA game:

- Tier 1: Soccer
- Tier 2: Basketball
- Tier 3: Tactical Shooting
- Tier 4: Car Racing

Rare and limited NFTs, with staking levels (Silver, Gold, Diamond, Black), will recognize early backers and contributors —but will never confer a competitive advantage in matches. They are symbols of recognition, not power.

**RARE AND  
LIMITED NFTS**

# AFFILIATES & PARTNERSHIPS

- Affiliates: Automated system — 5% in SCG per referral.
- Partnerships with platforms: Tokens allocated to Tokpie as part of strategic agreements.
- Automation is efficiency. With a minimal team, we scale fairly.

A soccer ball with black and white panels is resting on a green grassy field. The ball is positioned in the lower-left quadrant of the image. The grass is vibrant green and slightly out of focus in the background.

# THE PILLARS OF

- Pure skill-based modes — no RNG (Random Number Generator). This means: no luck, no dice, no roulette. Everything depends on your talent.
- Scale economy — everything revolves around the token: entry, upgrades, rewards.
- Limited XP — prevents power inflation and maintains fair competition.
- In-house wallet — no unnecessary fees, no MetaMask, just you and the competition.

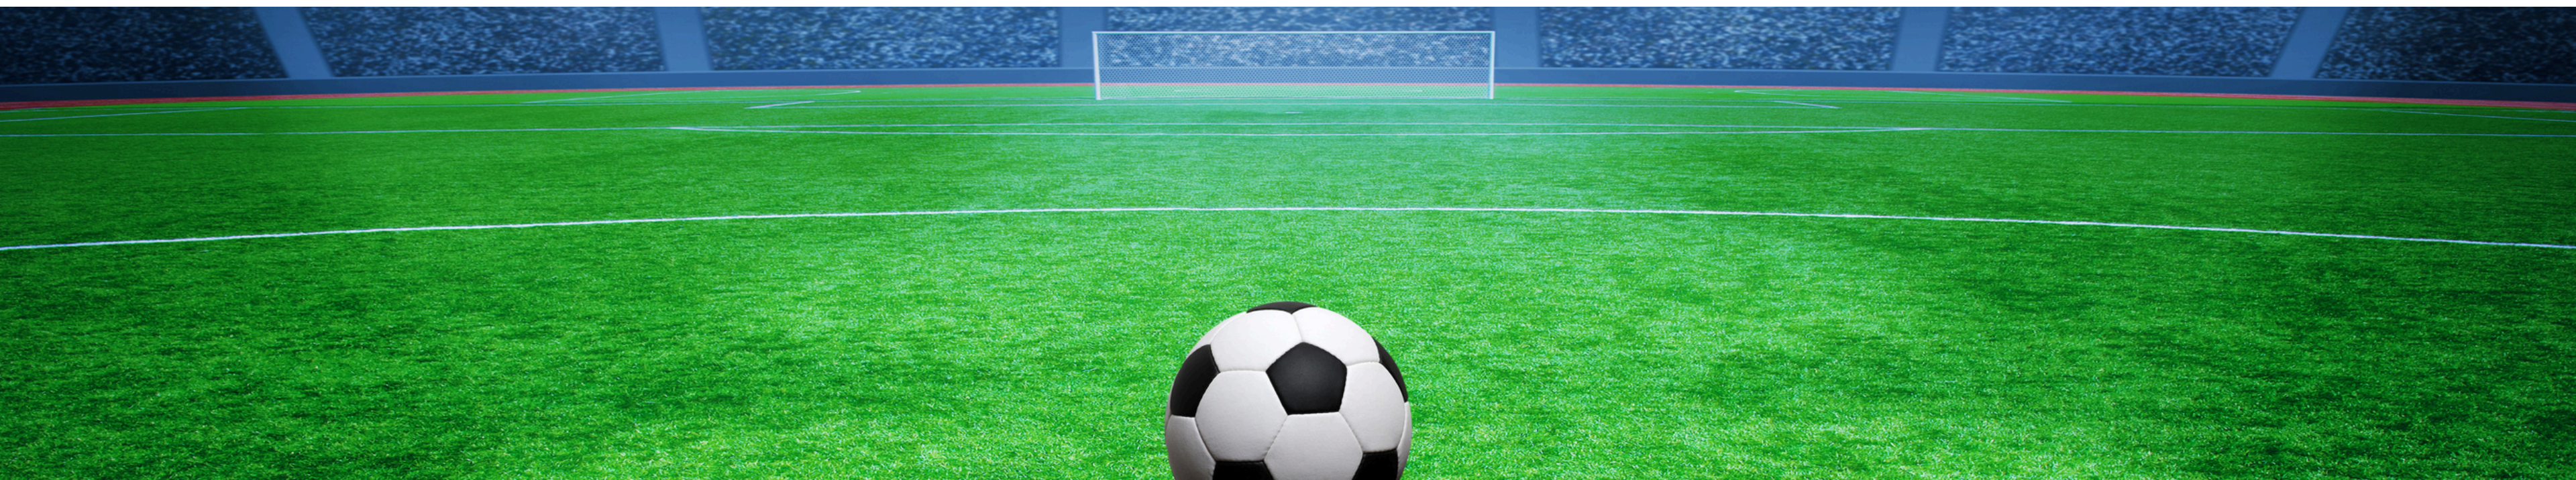

# ECOSYSTEM

# TRUST MECHANISMS

- Contract waived — immutable forever.
  - Progressive liquidity — released 4 weeks after Tier 4.
  - Security reserve — 42% locked for 5 years.
  - Full transparency — all portfolios publicly available on BCScan.
  -
- “Transparency is not optional — it’s mandatory.”

# CONCLUSION

## STAMINA COIN GAME - SCG

The Stamina Coin Game will be born with a rare balance: technical ambition, economic responsibility, and respect for user freedom. With only 2% of the supply available, 98% dedicated to real-world utility, and fair and sustainable staking, the project will be prepared to last for decades—not weeks.

There will be no hype. There will be no empty promises. Only fair competition, evolution, and autonomy.

Welcome to the world's first decentralized digital league.

Here, your talent is worth more than your balance.
